

Case Study: FINANCE

WHO

- World's largest technology solutions provider to financial services
- Multiple sites globally
- 52,000 employees worldwide
- Fortune 500 company

CHALLENGE

- Using third-party datacentre services for some of their solutions
- Modular approach of service provider creating unnecessary costs
- Wanted to move their DR/BC back in-house
- Knew they could save money by doing so
- 3rd party provider making this difficult
- Needed expert help to design a new solution and then migrate

SOLUTION

- Coordinated right expertise from Services Ecosystem
- Leaders in network and storage design
- Provided professional services consultation on design of new platform
- Output 2x documents of how process could work
- Decided to put project on hold temporarily - timing not right

BENEFITS

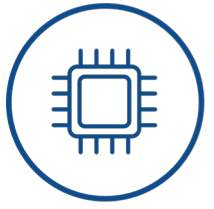

- Highly in-depth document outlining equipment, process, etc.
- Outlined substantial savings bringing this solution in-house
- Greater flexibility and control
- Post-implementation service desk
- Handover period to customer IT team

WHY SERVIUM?

- Approached due to previous engagement on critical storage project
- Fast access to subject matter experts
- Knowledge transfer to customer
- Leverage of Services Ecosystem
