

Case Study: MANUFACTURING

WHO

- One of the largest thermosetting moulding companies in Europe
- Global specialist manufacturer

CHALLENGE

- Motivated by plans to expand the business
- Held back by legacy technology and expensive support
- Storage refresh necessary to future-proof business
- Needed something fast, scalable and economic to run

SOLUTION

- Servium put forward recommendations of suitable vendor technologies
- Solutions for Pivot3, HPE and Dell suggested
- Wider review of infrastructure revealed it would be more cost-effective to refresh server, storage, hypervisor together
- Chose Dell EMC technology for complete refresh
- Solution Architect included in solution - 15 days' work

Servium

BENEFITS

- Simple to use GUI meant simplified operation of infrastructure
- Exceptional commercial value achieved through solution
- Delivered over 3 weeks in a phase-by-phase approach
- Pre-staged in Servium Configuration Suite
- Impressive IOPs from using SSD storage
- Excellent documentation on project to inform future operation

WHY SERVIUM?

- Competitive edge
- Impressive services credentials
- Proven track record of success with customer
- Commitment to detailed knowledge transfer for operating new system
