

WITH THREATS TO DATA INCREASING DAILY, IT'S NOT A MATTER OF IF — BUT WHEN

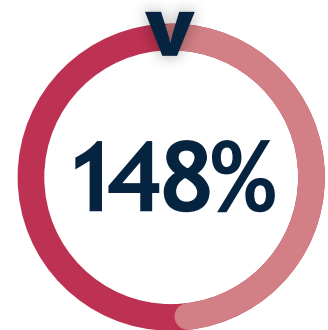

From ransomware attacks to migrations, data loss can happen at any time and without warning.

Only
8%
of all ransom-paying
organisations get their
data back.[†]

of companies with a cyber
insurance policy said that it
only covers a small part
of the damages.^{††}

Ransomware attacks are at
an all-time high — up over 148%
since the beginning of
2021 alone.^{†††}

Protect your business with a solution that:

- Delivers disaster recovery resilience and automated failover to keep systems running.
- Continuously backs up data so you never need worry about backup windows again.
- Detects ransomware in real-time and enables you to rewind and restore data to a point in time prior to infection.
- Simplifies the movement of data and apps to the cloud, with the option to move back at any time.

Zerto from HPE

Protect all your data. All the time.

Industry-leading ransomware resilience, disaster recovery, and continuous data protection for any app, any cloud, and any recovery SLA.

Zerto brings together disaster recovery and data protection across on-premises, hybrid, and multi-cloud setups. It provides everything you need to protect infrastructure, applications and data from the risks threatening your environment.

With Zerto on your side, you can:

- Radically reduce data loss and downtime.
- Simplify data protection strategy.
- Detect and recover from ransomware.
- Enjoy seamless app and data mobility between clouds.
- Eliminate business disruption from IT outages.
- Ensure 24/7 data protection.
- Remove the risk of migrating apps and data to the cloud.
- Easily adopt a multi-cloud strategy.
- Start small and scale protection to thousands of virtual machines.

The Results

to a point just seconds before an attack.

RPOs and RTOs.

to malicious events with real-time encryption detection.

Set up a no-obligation meeting with our experts to see how our technology suite can support your business needs.

Experience Zerto wherever and however you want

Zerto data management is available for on-premises and cloud-based workloads. But now, you can also adopt it as a simple, flexible SaaS-based data protection solution on HPE GreenLake, the edge-to-cloud platform. Rapidly locate and deploy enterprise-class HPE technologies according to your needs, and benefit from one unified, fully managed, on-premises operating model – no matter the size of your business.
