Increase your productivity with a solution that:

- Automates routine tasks and streamlines repetitive workflows to help you focus on areas of value.
- Puts intelligent AI assistance at your fingertips within the familiar Microsoft apps your teams use every day.
- Draws on insights from documents, data and meeting summaries to deliver polished and professional content outputs in minutes.
- Unlocks the full potential of your organisation's knowledge while maintaining robust security and compliance standards.

Microsoft 365 Copilot

Take productivity to new heights

Seamlessly integrated into your existing business workflows, Microsoft 365 Copilot combines a powerful workplace AI agent with the familiarity of Microsoft apps to transform the way your people work.
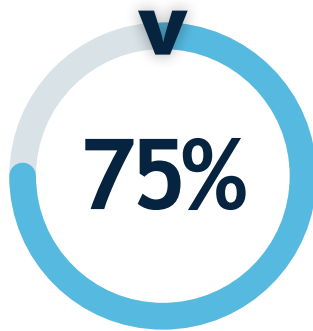

Whether it's content generation to help craft the perfect email, capturing notes and action points from a critical meeting, or analysing spreadsheets to find the key data you need, you can call on extraordinary capabilities that extend and amplify the impact of your people.

Microsoft 365 Copilot also works as a helpful assistant, integrating with SharePoint and OneDrive to help you gather information from multiple sources in minutes. In short, whatever you're doing, Microsoft 365 Copilot helps you do it faster.
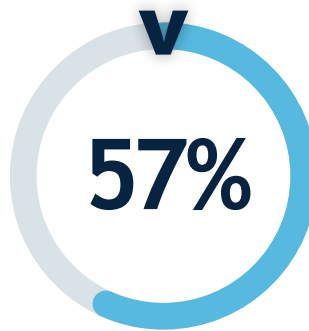

With Microsoft 365 Copilot on your side, you can:

- Create high-quality content in a fraction of the time.
- Extract insights from complex data instantly.
- Transform meetings with real-time summaries and action items.

- Enhance email communications with smart drafting.
- Streamline presentations with design suggestions and visual improvements.
- Work confidently with AI knowing company data is secure.

The Results

75%
of users report an increase in productivity.[†]

57%
of employees enjoy their work more when using Microsoft 365 Copilot.[††]

30%
reduction in time spent onboarding new hires.[†††]
